PROJECTS

- **Bluelock** (view)   *(Feb'25)*
- Developed a responsive, anime-themed football website inspired by *Blue Lock*, integrating advanced JavaScript and GSAP animation to create engaging, dynamic user experiences. Focused on blending visual storytelling with intuitive user interaction by implementing smooth, controlled animations and modern frontend practices to deliver a fast, clean, and responsive interface. Demonstrated strong skills in web design, animation logic, and frontend problem-solving throughout the project lifecycle. .

- **Horizon Tracks** (view)   *(Jan'25)*
Built a responsive frontend application using **React** and **Vite** as part of a focused task (React Task 2). Set up the project architecture with modern tooling including ESLint configuration and Vite for fast development with hot module replacement (HMR). Implemented clean component structure, modular styles, and JavaScript logic to deliver an interactive UI. Demonstrated proficiency in core frontend technologies, environment setup, and development conventions for scalable web apps..

- **Portfolio** (view)   (*JAN'25*)
    - Created a personal **portfolio website** using **HTML, CSS, and JavaScript** to showcase my skills, projects, and professional information. Organized the site structure with semantic markup and modular styling to ensure responsiveness and a clean user experience across devices. Demonstrated proficiency in core web technologies and design fundamentals by building a fully functional static website from scratch that highlights my work and technical capabilities..
